

Contribution of life cycle stages 1 to 4, identical in all four scenarios

Resource use, minerals and metals (kg Sb eq)

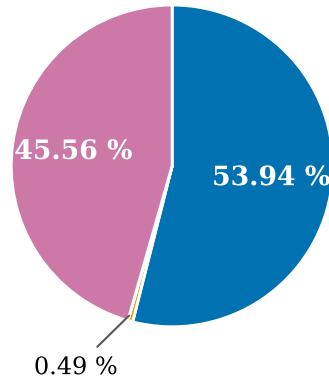

S1 Materials and construction 97.8433 %
S2 Hardware assembly 0.4450 %
S3 Distribution 0.0003 %
S4 Use phase 1.7114 %
stages 1 to 4 = 99.9998 % of the gross result

Climate change (kg CO2 eq)

S1 Materials and construction 52.5384 %
S2 Hardware assembly 0.6018 %
S3 Distribution 0.0381 %
S4 Use phase 46.8216 %
stages 1 to 4 = 99.7596 % of the gross result

Eutrophication, freshwater (kg P eq)

S1 Materials and construction 53.9435 %
S2 Hardware assembly 0.4906 %
S3 Distribution 0.0016 %
S4 Use phase 45.5643 %
stages 1 to 4 = 99.9981 % of the gross result

■ S1 Materials and construction ■ S2 Hardware assembly ■ S3 Distribution ■ S4 Use phase

Wedges below 5 % are labelled outside; below 0.1 % they are listed beneath the chart only. Basis: the stage 1 to 4 subtotal = 100 %.
